RFQ OVERVIEW

This brief outlines the content requirements and design direction for the development of a professional corporate website for Knights Gate Advisors (KGA), a GCC-based capital advisory firm founded by Khalil Alawadhi with over 30 years of regional and international financial experience. The site must reflect the firm's institutional calibre, discretion, and deep-rooted relationships across sovereign, institutional, and High Net Worth Individuals (HNWI) segments across the six Gulf states.

The website will serve as the firm's primary digital presence — a credibility anchor for prospective clients and counterparties.

DESIGN & BRANDING

Table 1: Design and Branding Inputs

Design Item	Input
Brand Colours	Dark, premium, understated. Think deep navy or charcoal backgrounds with gold or platinum accents. No clutter.
Typography	Serif for headings (authority/tradition), clean sans-serif for body (readability).
Existing brand assets	Upon request (Including logos & banners)
Imagery	Abstract architectural photography of financial districts (DIFC, Riyadh, Manama) or textured dark overlays — no stock photo clichés.
Mobile Optimisation	Yes
Why KGA?	Icon grid or three-column layout with concise value propositions.
Founders section	Full-width biographical block with portrait photograph — gravitas, not a LinkedIn card.
